DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 4,213,818 issued to Lemons et al.

Lemons teaches etching chromium-containing layers. Lemons teaches etching using parameters that match those use by applicant. As such, Lemons is considered to etchant a power level below that which causes a jump in plasma density. See figure 12.
